WORK EXPERIENCE

Microsoft

Software Engineer

Aug 2023 – Present

Redmond, WA

- Developed a full-stack Slack-To-Teams migration app projected to annually bring in **\$324M+** & **81M** users; lead front-end development in America while coordinating across Asia with multiple teams
- Engineered a push notification feature processing **30K** requests daily; with public docs reaching **10K+** monthly users
- Improved BI infrastructure provisioning by **90%**, saving **1K\$** monthly by automating infra provisioning
- Reduced bugs by **87%** by developing end-to-end tests for distributed backend APIs
- Successfully resolved a **Sev 1 outage** that prevented delivery of **2.2B** notifications to **100K** companies

SellStatic

Chief of Product & Engineering Lead

Jan 2023 - Present

Toronto, ON

- Developed a 0-1 product that uses **AI** to generate and distribute ads, resulting in **\$1K monthly** revenue and a wait list of **1.2K** potential customers
- Conceptualized and engineered new features (in-house image/video editor, caching solutions) that reduced costs **30%**; improved customer retention by **40%** and reduced bugs by **80%** by leading a front-end overhaul
- Managed a team of **14 members** across multiple disciplines (engineering, design, sales and business)

Microsoft

Software Engineering Intern

May 2020 - Aug 2023

Seattle, WA

- Developed a **global** image preview feature on Outlook; currently used by **millions** of users daily
- Improved feature discovery by **30%** by building intelligent adverts on Outlook Search based on user profiles.
- Developed a compliant REST API for lifecycle management of Teams app data, with a full-stack demo pitched to senior leadership and enterprise clients like Bloomberg

Konrad Group

Software Engineering Intern

Jan 2022 - April 2022

Toronto, ON

- Developed reusable front-end components for an internal tool used by **thousands** of users daily

Kinaxis

Software Engineering Intern

Sept 2021 - Jan 2022

Ottawa, ON

- Converted a **C# SOAP API** to a **REST API** & optimized algorithmic complexities (quartic to quadratic)

CIBC

Full-Stack Developer Intern

Jan 2021 - May 2021

Toronto, ON

- Introduced **entire** front-end testing environment resulting in improved coverage (**0 -> 80%**)
- Optimized SQL DB queries improving API response times by **50%** & refactored legacy code which reduced lines of code by **33%**

Loblaw

Data Analyst Intern

May 2019 - Aug 2019

Brampton, ON

- Developed a NLP algorithm automating **99%** of tasks, improving efficiency by **500X** and saving **\$80K+** annually

SKILLS

Languages: TypeScript, C#, Python, Java, Go, C/C++

Frameworks: React, Node, .NET, Satchel/MobX, Pandas, Matplotlib, Jest, Enzyme, Flask

Tools: Git, Azure, GCP, Heroku, Postman, Swagger, Jira

EDUCATION

McMaster University

Sep 2018 - May 2023

B.Eng in Software & Biomedical Engineering (Dual Major)

GPA: 3.7/4.0

- Relevant Coursework: Data Structures & Algorithms, Databases, Project Management, Optimization
- University Jobs: Part-time Software Developer from Oct 2019; Databases TA; Software Requirements TA
